LES JE LEP. MASIVNO LESENO POHIŠTVO DOMMO.

LES, IZ KATEREGA JE IZDELANO POHIŠTVO DOMMO, JE POSEBEJ IZBRAN IN NARAVNO SUŠEN. LEPLJEN JE Z LEPILI, KI NE VSEBUJEJO FORMALDEHIDA, IN ZAŠČITEN Z NARAVNIMI OLJI ALI MILNICO.

TAKO DOBIMO POPOLNOMA NARAVEN IZDELEK, KI S SVOJO TOPLINO PRINESE DEL NARAVE TUDI V VAŠ DOM.

ENOSTAVNE OBLIKE SE DOPOLNJUJEJO Z BOGATO STRUKTURO IN RAZLIČNIMI BARVNIMI ODTENKI LESA, ZARADI KATERIH JE VSAK ŠE TAKO MAJHEN KOS POHIŠTVA UNIKATEN.

Z VELIKO POZORNOSTJO DO VSAKEGA DETAJLA PRI ZAKLJUČNI ROČNI OBDELAVI DOBIMO VRHUNSKO IZDELKE, KI JIH NE OMEJUJE ČAS, AMPAK DOLOČATA UPORABNOST IN LEPOTA.

TEHNIČNE ZNAČILNOSTI

Pohištvo DOMMO je izdelano iz masivnega lesa evropskega izvora in obdelano z visoko kvalitetnimi naravnimi rastlinskimi olji in/ali milnico, ki ga ščitijo pred izsušitvijo, prahom in umazanijo, s čimer ohranja svojo naravno lepoto.

Spremenljivost v strukturi letnic, barvah in grče so značilni za masivni les in naredijo vsak posamezen kos pohištva unikaten. Razlike v naravnih barvah lesa povzročajo različni minerali, ki jih najdemo v zemlji, kjer je drevo raslo, njihova sestava pa se razlikuje za posamezno drevo in med različnimi drevesi. Ta naravni pojav se odraža v čudovitih spremembah barve in strukture lesa, iz katerega je narejeno naše pohištvo, in se ne šteje za pomanjkljivost, temveč ga zaradi tega še toliko bolj cenimo. Masivni les lahko spreminja barvo tudi zaradi izpostavljenosti sončni svetlobi, zato ga, če želite to preprečiti, ne izpostavljajte neposredni sončni svetlobi.

Masivni les je naraven, živ material, ki diha in reagira na spremembe klimatskih pogojev (temperaturo, vlago). V suhem okolju se les krči, v vlažnem pa širi. Zdrava klima v vašem bivalnem prostoru s temperaturo med 18 in 23 °C ter relativno vlažnostjo med 40 in 60 % hkrati predstavlja optimalne pogoje tudi za masivni les.

Morebitne razpoke ali zvijanje elementov iz masivnega lesa, ki se lahko pojavijo, so posledica velikih klimatskih sprememb (odstopanj od priporočene temperature in vlage). Poleg tega priporočamo, da pohištva ne izpostavljate ekstremnim razmeram (neposredni sončni svetlobi, dežju, močnim virom toplote, vročim predmetom ...).

Po našem standardu je razmerje med jedrom in beljavo ter med tangencialnim in radialnim rezom uporabljenega lesa 50 % : 50 %. Število grč premera največ 30 mm, ki ne vplivajo na izgled in statično stabilnost lesa, je 3-5 na m². Grče so lahko zadelane z lesnim kitom. Na posameznem elementu pohištva, izdelanem iz lesa oreha, se lahko pojavi skupaj največ 10 cm dolg del stržena (centralnega dela debla), ki je zadelan z lesnim kitom in obarvan na barvo ostalega lesa.

UPORABA, NEGA IN VZDRŽEVANJE

UPORABA MASIVNEGA POHIŠTVA

Naravno olje in milnica ne zagotavljata popolne zaščite lesa proti madežem pri vsakodnevni uporabi masivnega pohištva, zato upoštevajte naslednja priporočila:

Ostanke hrane ali pijače je treba takoj odstraniti in površino obrisati z vlažno krpo.

Pod hladnimi in vročimi pijačami uporabljajte podstavke, hladna pločevinka lahko pusti madež. Enako velja za vročo posodo.

Predmete dvignite s površine pohištva in jih premaknite, ne drsajte jih po površini pohištva.

Izogibajte se uporabi ostrih predmetov na površini pohištva.

Izogibajte se uporabi agresivnih čistil, topil ipd. v bližini pohištva, saj lahko že kaplja razlitega sredstva povzroči madež ali razbarvanje.

NEGA MASIVNEGA POHIŠTVA

Površino pohištva redno brišite s suho bombažno krpo. Morebitno umazanijo obrišite z vlažno krpo, lahko pa uporabite tudi blago čistilno sredstvo. Uporaba agresivnih čistil je prepovedana, saj lahko odstranijo osnovno zaščito lesa ali povzročijo spremembo barve lesa. Vodo uporabljajte le v omejenih količinah, morebitno stoječo vodo pa vedno obrišite.

Priporočamo uporabo čistila "WOCA Natural soap" proizvajalca WoodCare Denmark A/S, ki ga lahko kupite v naši trgovini. Za redno čiščenje je treba čistilo razredčiti z vodo v razmerju 1 : 40. Po čiščenju je treba površino obrisati s čisto vlažno krpo. Upoštevajte navodila proizvajalca, ki so navedena na embalaži.

VZDRŽEVANJE MASIVNEGA POHIŠTVA

Po treh in po šestih mesecih po nakupu pohištva je treba pohištvo ponovno premazati s sredstvom (oljem in/ali milnico), ki ste ga dobili v setu za vzdrževanje. Naslednje vzdrževanje je treba izvesti vsaj enkrat letno oziroma po potrebi.

Za osnovno obdelavo in za vzdrževanje masivnega pohištva se uporabljajo naravna olja in/ali milnica WOCA priznanega proizvajalca WoodCare Denmark A/S. Več informacij lahko najdete na: www.woca.info. Za vzdrževanje uporabljajte izključno sredstva, ki jih najdete v priloženem setu za vzdrževanje, sicer pa jih lahko kupite v naši trgovini.

Odstranjevanje madežev:

Madeže je treba odstraniti takoj, ko se pojavijo. Za odstranitev madežev uporabite brusni papir granulacije 220. Smer brušenja mora biti vedno enaka smeri letnic v lesu. Za morebitne globlje madeže lahko predhodno uporabite tudi papir granulacije 120, vendar mora temu pred oljenjem ali miljenjem vedno slediti brušenje z granulacijo 220. Po brušenju površino posesajte in obrišite z rahlo vlažno krpo in po popolni osušitvi nanesite olje ali milnico po spodaj opisanem postopku.

Oljenje (obdelava 01 in 02):

Površina lesa mora biti čista in suha. Olje pred uporabo dobro pretresite. Majhno količino olja nanesite na belo bombažno krpo ter ga enakomerno nanesite po obdelovani površini. Smer nanašanja naj bo enaka smeri letnic lesa. Počakajte približno 15 minut, da se olje vpije v les. S suho belo bombažno krpo nato vtrite olje v površino, da je površina napojena z oljem, vendar suha na otip. Pazite: če je na površini odvečna količina olja, ga odstranite ali nanesite na naslednji del obdelovane površine.

Pri belem olju se s skrajšanjem ali podaljšanjem časa med nanašanjem in vtiranjem olja doseže različna stopnja vpojnosti belega pigmenta in s tem postane po vtiranju površina manj ali bolj bela. Čas vpivanja belega olja prilagodite željenemu odtenku beline. Olje se pri 20 °C posuši v šestih urah, končno trdnost pa doseže v 72 urah.

POZOR!

PRI KRPAH, KI JIH UPORABLJATE ZA NANOS ALI BRISANJE OLJA, LAHKO PRIDE DO SAMOVŽIGA. PO UPORABI KRPE DOBRO ZMOČITE, JIH ZAPRITE V PVC VREČKO TER ODVRZITE V ZABOJNIK ZA NEVARNE ODPADKE.

Miljenje (obdelava 03 in 04):

Površina lesa mora biti čista in suha. Milnico pred uporabo dobro pretresite in jo razredčite z vodo v razmerju 1 : 5. Majhno količino milnice nato nanesite na belo bombažno krpo ter jo enakomerno nanesite po obdelovani površini. Smer nanašanja naj bo enaka smeri letnic lesa. Počakajte približno 15 minut, da se milnica vpije v les. S suho belo bombažno krpo nato vtirite milnico v površino, da je površina napojena z milnico, vendar suha na otip. Pazite: če je na površini odvečna količina milnice, jo odstranite ali nanesite na naslednji del obdelovane površine. Počakajte nekaj ur, da se površina popolnoma posuši, in jo nato nežno obrusite z brusnim papirjem granulacije 220. Smer brušenja mora biti vedno enaka smeri letnic v lesu. Po končanem brušenju površino obrišite s suho krpo ali posesajte, da odstranite ves lesni prah, nato pa jo obrišite z vlažno krpo. Pri beli milnici se s skrajšanjem ali podaljšanjem časa med nanašanjem in vtiranjem milnice doseže različna stopnja vpojnosti belega pigmenta in s tem postane po vtiranju površina manj ali bolj bela. Čas vpivanja bele milnice prilagodite željenemu odtenku beline.

Oljenje in miljenje (obdelava 05 in 06):

Površina lesa mora biti čista in suha. Olje in milnico pred uporabo dobro pretresite, milnico razredčite z vodo v razmerju 1 : 5. Pri obdelavi z oljem in milnico je vedno potrebno najprej oljenje in nato miljenje. Majhno količino olja nanesite na belo bombažno krpo ter ga enakomerno nanesite po obdelovani površini. Smer nanašanja naj bo enaka smeri letnic lesa. Počakajte približno 15 minut, da se olje vpije v les. S suho belo bombažno krpo nato vtirite olje v površino, da je površina napojena z oljem, vendar suha na otip. Pazite: če je na površini odvečna količina olja, ga odstranite ali nanesite na naslednji del obdelovane površine. Pri belem olju se s skrajšanjem ali podaljšanjem časa med nanašanjem in vtiranjem olja doseže različna stopnja vpojnosti belega pigmenta in s tem postane po vtiranju površina manj ali bolj bela. Čas vpivanja belega olja prilagodite željenemu odtenku beline. Počakajte nekaj ur, da se površina popolnoma posuši. Olje se pri 20 °C posuši v šestih urah, končno trdnost pa doseže v 72 urah. Majhno količino milnice nato nanesite na belo bombažno krpo ter jo enakomerno nanesite po obdelovani površini. Smer nanašanja naj bo enaka smeri letnic lesa. Počakajte približno 15 minut, da se milnica vpije v les. S suho belo bombažno krpo nato vtirite milnico v površino, da je površina napojena z milnico, vendar suha na otip. Pazite: če je na površini odvečna količina milnice jo odstranite. Počakajte nekaj ur, da se površina popolnoma posuši, in jo nato nežno obrusite z brusnim papirjem granulacije 220. Smer brušenja mora biti vedno enaka smeri letnic v lesu. Po končanem brušenju površino obrišite s suho krpo ali posesajte, da odstranite ves lesni prah, nato pa jo obrišite z vlažno krpo. Pri beli milnici se s skrajšanjem ali podaljšanjem časa med nanašanjem in vtiranjem milnice doseže različna stopnja vpojnosti belega pigmenta in s tem postane po vtiranju površina manj ali bolj bela. Čas vpivanja bele milnice prilagodite željenemu odtenku beline.
